

**Job Title: Ag Data Technician**

**Location: Fostoria, OH (Partial work-from-home capabilities)**

**Reports To: [Insert Supervisor's Title]**

**Description:** The Data Technician will manage and support data processes within the company, focusing on agronomy and agricultural data. This role will involve working with various platforms and software, assisting with data cleaning, analysis, and generating reports. The position supports both seasonal activities and regular data management tasks to ensure smooth operations.

**Key Responsibilities:**

- Manage and track accurate data related to agricultural practices using multiple software tools.
- Input, analyze, and organize data, ensuring accuracy and quality.
- Conduct on-farm visits to collect and transfer data to and from growers' machines.
- Assist with data analysis and reporting to inform decision-making.
- Set up new growers in current software.
- Create and optimize management zones based on current and historical data.
- Assist with preparation and collection of soil samples.
- Develop seeding scripts for planting.
- Collaborate with agronomy teams to develop fertility scripts for spring and fall.
- Assist in the creation of resources to support customer operations such as planting books.
- Provide ongoing support during key agricultural seasons, including planting, scouting, and harvesting.

**Additional Duties:**

- Assist sales and leadership team as needed.
- Assist with field scouting efforts, helping to identify crop health, pest issues, and other agronomic factors that influence decision-making.
- Support soil sampling efforts as needed, ensuring that data collected from soil tests is accurate

**Qualifications and Education:**

**Required:**

- Knowledge of the agricultural industry.
- Ability to learn, understand, and apply new technologies.
- Excellent communication skills, both verbal and written.
- Ability to work independently and as part of a team.

**Job Title: Ag Data Technician**

**Location: Fostoria, OH (Partial work-from-home capabilities)**

**Reports To: [Insert Supervisor's Title]**

- High proficiency with computers and data management tools
- Precision Ag data technology experience ( 2-3 Years)
- Strong analytical and problem-solving skills
- Active valid driver's license with a clean driving record.

**Preferred:**

- Associates degree or equivalent experience in Data Management, Agronomy, or a related field.

**Work Environment:**

- The position is based in Fostoria, OH, with some remote work capabilities and occasional fieldwork during scouting, sampling, or data collection periods.
- Occasional travel may be required for training, field visits, and industry events.
- This is a full-time position but may involve extended hours during peak agricultural seasons.

**Salary & Benefits:**

- Competitive salary based on experience
- Benefits include paid vacation and holidays, optional medical insurance plans with company assistance, and 401K with employer matching (subject to qualifications and employment requirements).
- Use of a company vehicle for job-related duties.
